INDEX TO VOLUME 18—1983

Index to Authors and Contributors

ABDUL-MIHSEIN, M. J. *Paper* Some boundary integral equation solutions for three-dimensional stress concentration problems, 207
ADORISIO, D. *Paper* Model studies on plate girders, 111
ASUNDI, A. *Paper* Applications of the white light speckle method to interior displacement measurement, 23

BAKR, A. A. *Paper* Boundary integral equation analysis of axisymmetric thermo elastic problems, 239
BOURDILLON, H. *Paper* Elastic–plastic analysis of thermally loaded cylindrical shells, 37

CHAKRAVARTI, P. C. *Paper* The determination of the equivalent strain in finite, homogeneous deformation processes, 119
CHANDRA, A. *Paper* Applications of the boundary element method to large strain large deformation problems of viscoplasticity, 261
CHIANG, F. P. *Paper* Applications of the white light speckle method to interior displacement measurement, 23
CONWAY, J. C., Jr *Paper* Determination of Mode I stress intensity factors in surface-flawed plates by scattered light photoelasticity, 173
CROLL, J. G. A. *Papers* Vibration tests on spherical shell caps, 27. Experimental and theoretical correlations for elastic buckling of axially compressed stringer stiffened cylinders, 41. Experimental and theoretical correlations for elastic buckling of axially compressed ring stiffened cylinders, 81

DE SOUZA, V. C. M. *Paper* Vibration tests on spherical shell caps, 27

EISSA, M. *Paper* Three dimensional elastic stress distribution in end-milled keyed connections, 143
ELLINAS, C. P. *Papers* Experimental and theoretical correlations for elastic buckling of axially compressed stringer stiffened cylinders, 41. Experimental and theoretical correlations for elastic buckling of axially compressed ring stiffened cylinders, 81

FESSLER, H. *Papers* Stresses in a bottoming stud assembly with chamfers at the ends of the threads, 15. Three dimensional stress distribution in end-milled keyed connections, 143
FENNER, R. T. *Papers* The boundary integral equation (boundary element) method in engineering stress analysis, 199. Some boundary integral solutions for three-dimensional stress concentration problems, 207. Boundary integral equation evaluation of compression moduli of bonded rubber blocks, 217. Boundary integral equation analysis of axisymmetric thermoelastic problems, 239

GAMBY, D. *Paper* Elastic–plastic analysis of thermally loaded cylindrical shells, 37

HILLS, D. A. *Papers* An analysis of shot peening, 95. Some useful results in the classical Hertz contact problem, 101. Some useful results in the tangentially loaded Hertzian contact problem, 107. *Research Note* A note on the Hertz contact problem: a correlation of standard formulae, 195
HOLMES, J. W. *Paper* Determination of Mode I stress intensity factors in surface-flawed plates by scattered-light photoelasticity, 173
HOLMES, R. A. *Paper* Determination of Mode I stress intensity factors in surface-flawed plates by scattered-light photoelasticity, 173
HYDE, T. *Papers* Stress concentration due to axial tension and bending of loaded axisymmetric projections, 7. The uniaxial and biaxial monotonic and cyclic plasticity behaviour of lead alloy model material, 125. Elastic–plastic–creep behaviour of a compact-tension specimen, 157

JINDAL, U. C. *Paper* Reduction of stress concentration around a hole in a uniaxially loaded plate, 135
JOBSON, P. K. *Paper* Stresses in a bottoming stud assembly with chamfers at the ends of the threads, 15

KELLY, D. A. *Paper* Creep life of AISI 316 stainless steel loaded at constant strain rate, 189
KFOURI, A. P. *Paper* An elastic–plastic finite element analysis of a compact tension specimen, 69
KINKEAD, A. N. *Paper* Analysis for inversion load and energy absorption of a circular tube, 177
KLINTWORTH, G. C. *Paper* Stress concentration factors for cracked C-shaped and ring type test-pieces, 225
KOBAYASHI, N. *Paper* Creep stress redistribution in a visco-elastoplastic strip containing a hole, 1
KURUPPU, M. D. *Paper* Determination of stable crack growth resistance of ductile material using an RDCB specimen, 151

LAGERKVIST, L. *Research Note* Effect of contributions from bending in evaluation of axial strain in rods with circular cross-section, 77
LEE, K. H. *Paper* Elastic–plastic stress analysis of a cracked thick-walled cylinder, 253
LOW, K. C. *Paper* Elastic–plastic–creep behaviour of a compact-tension specimen, 157
LUNDBERG, B. *Research note* Effect of contribution from bending in evaluation of axial strain in rods with circular cross-section, 77

MACKNEY, M. D. A. *Paper* Deformation and stability studies of thin-walled domes under uniform external pressure, 167
MARSDEN, B. J. *Paper* Stress concentrations due to axial tension and bending of loaded axisymmetric projections, 7
MORRISON, C. J. *Paper* Creep life of AISI 316 stainless steel loaded at constant strain rate, 189
MUKHERJEE, S. *Paper* Applications of the boundary element method to large strain large deformation problems of viscoplasticity, 261

NARAYANAN, R. *Paper* Model studies of plate girders, 111
NISHITANI, T. *Paper* Creep stress redistribution in a visco-elastoplastic strip containing a hole, 1
NOBLE, B. *Paper* An analysis of shot peening, 95

REMZI, E. M. *Paper* Boundary integral equation evaluation of compression moduli of bonded rubber blocks, 217
ROSS, C. T. F. *Paper* Deformation and stability studies of thin-walled domes under uniform external pressure, 167

SACKFIELD, A. *Papers* Some useful results in the classical Hertz contact problem, 101. Some useful results in the tangentially loaded Hertzian contact problem, 107. *Research note* A note on the Hertz contact problem: a correlation of standard formulae, 195
SOWERBY, R. *Paper* The determination of the equivalent strain in finite, homogeneous deformation processes, 119
STACEY, A. *Paper* Stress concentration factors for cracked C-shaped and ring type test-pieces, 225
SUNDIN, K.-G, *Research note* Effect of contributions from bending in evaluation of axial strain in rods with circular cross-section, 77

TAN, C. L. *Papers* Boundary integral equation stress analysis of a rotating disc with a corner crack, 231. Elastic–plastic stress analysis of a cracked thick-walled cylinder, 253

WATERHOUSE, R. B. *Paper* An analysis of shot peening, 95
WEBSTER, G. A. *Paper* Stress concentration factors for cracked C-shaped and ring type test-pieces, 225
WEBSTER, J. J. *Paper* Elastic–plastic–creep behaviour of a compact-tension specimen, 157
WOO, C. W. *Paper* Determination of stable crack growth resistance of ductile material using an RDCB specimen, 151

Subject Index

A NOTE ON THE HERTZ CONTACT PROBLEM: A CORRELATION OF STANDARD FORMULAE, *Research note*, 195
AISI 316 stainless steel, creep life of, 189
Almen number, 99
ANALYSIS FOR INVERSION LOAD AND ENERGY ABSORPTION OF A CIRCULAR TUBE, *Paper*, 177
AN ANALYSIS OF SHOT PEENING, *Paper*, 95
AN ELASTIC–PLASTIC FINITE ELEMENT ANALYSIS OF A COMPACT-TENSION SPECIMEN, *Paper*, 69
APPLICATIONS OF THE BOUNDARY ELEMENT METHOD TO LARGE STRAIN LARGE DEFORMATION PROBLEMS OF VISCOPLASTICITY, *Paper*, 261
APPLICATIONS OF THE WHITE LIGHT SPECKLE METHOD TO INTERIOR DISPLACEMENT MEASUREMENT, *Paper*, 23
Axial strain in rods with circular cross section, effect of contributions from bending in evaluation of, 77
Axial tension and bending of loaded axisymmetric projections, stress concentrations due to, 7
Axisymmetric projections, 7
Axisymmetric thermoelastic problems, boundary integral equation analysis of, 239

Bonded rubber blocks, compression moduli of, 217
Bottoming stud assembly, stresses in, 15
Boundary element method, 199
  application to large strain large deformation problems of viscoplasticity, 261 (*see also* Boundary integral equations, Boundary integral equation method, Boundary integral equation solutions)
Boundary integral equations, 199, 217, 239, 231
  formulation of, 232
BOUNDARY INTEGRAL EQUATION ANALYSIS OF AXISYMMETRIC THERMOELASTIC PROBLEMS, *Paper*, 239
BOUNDARY INTEGRAL EQUATION EVALUATION OF COMPRESSION MODULI OF BONDED RUBBER BLOCKS, *Paper*, 217
Boundary integral equation method:
  advantages and disadvantages, 203
  comparison with other methods, 201
  for two-dimensional problems, 215
  in two-dimensional elasto-plasticity, 254
Boundary integral equation solutions, three dimensional stress concentration problems, 207
BOUNDARY INTEGRAL EQUATION STRESS ANALYSIS OF A ROTATING DISC WITH A CORNER CRACK, *Paper*, 231

C-shaped and ring type test-pieces, cracked, stress concentration factors for, 225
Circular tube, inversion load and energy absorption of, 177
Compact-tension specimen, 157
  elastic–plastic–creep behaviour of, 157
  elastic–plastic finite element analysis of, 69
Compression moduli of bonded rubber blocks, boundary integral equation evaluation of, 217
CREEP LIFE OF AISI 316 STAINLESS STEEL LOADED AT CONSTANT STRAIN RATE, *Paper*, 189
CREEP STRESS REDISTRIBUTION IN A VISCO-ELASTOPLASTIC STRIP CONTAINING A HOLE, *Paper*, 1

DEFORMATION AND STABILITY STUDIES OF THIN-WALLED DOMES UNDER UNIFORM EXTERNAL PRESSURE, *Paper*, 167
DETERMINATION OF MODE I STRESS INTENSITY FACTORS IN SURFACE-FLAWED PLATES BY SCATTERED LIGHT PHOTOELASTICITY, *Paper*, 173
DETERMINATION OF STABLE CRACK GROWTH RESISTANCE OF DUCTILE MATERIAL USING AN RDCB SPECIMEN, *Paper*, 151
Disc, rotating, 231
Domes, thin-walled, 167
Ductile materials, determination of stable crack growth resistance of, 151

EFFECT OF CONTRIBUTIONS FROM BENDING IN EVALUATION OF AXIAL STRAIN IN RODS WITH CIRCULAR CROSS-SECTION, *Research note*, 77
Elastic buckling:
  of axially compressed ring stiffened cylinders, 81
  of axially compressed stringer stiffened cylinders, 41
Elastic–plastic analysis, 37, 69, 253
ELASTIC–PLASTIC ANALYSIS OF THERMALLY LOADED CYLINDRICAL SHELLS, *Paper*, 37
ELASTIC–PLASTIC–CREEP BEHAVIOUR OF A COMPACT-TENSION SPECIMEN, *Paper*, 157
ELASTIC–PLASTIC STRESS ANALYSIS OF A CRACKED, THICK-WALLED CYLINDER, *Paper*, 253
Elastic stress distribution, three dimensional, in end-milled keyed connections, 143
Energy absorption, of a circular tube, 177
Engineering stress analysis, boundary integral equation (boundary element) method in, 199
Equivalent strain, determination of, in finite, homogeneous deformation processes, 119
EXPERIMENTAL AND THEORETICAL CALCULATIONS FOR ELASTIC BUCKLING OF AXIALLY COMPRESSED RING STIFFENED CYLINDERS, *Paper*, 81
EXPERIMENTAL AND THEORETICAL CALCULATIONS FOR ELASTIC BUCKLING OF AXIALLY COMPRESSED STRINGER STIFFENED CYLINDERS, *Paper*, 41

Finite element analysis, of a compact-tension specimen, 69
Finite homogeneous deformation processes, determination of equivalent strain in, 119

Girders, plate, *see* Plate girders.

Hertz contact problem:
  classical, 101
  standard formulae, correlation of, 195
  tangentially loaded, 107

Interior displacement measurement, application of white light speckle method to, 23
Inversion load, of a circular tube, 177

Keyed connections, end-milled, elastic stress distribution in, 143

Lead alloy, 125
Loaded axisymmetric projections, stress concentrations due to axial tension and bending of, 7

Mode I stress intensity factors in surface-flawed plates, determination of, 173
MODEL STUDIES ON PLATE GIRDERS, *Paper*, 111

Photo viscoplasticity method, summary, 1
Plate girders, model studies on, 111
Prismatic shaft with square cross-section, torsion of, 25

RDCB specimen, 151
REDUCTION OF STRESS CONCENTRATION AROUND A HOLE IN A UNIAXIALLY LOADED PLATE, *Paper*, 135
Ring stiffened cylinders, elastic buckling of, 81
Ring type test-pieces, 225
Rods with circular cross-section, axial strain in, 77
Rotating disk with a corner crack, boundary integral equation analysis of, 231

Scattered light photoelasticity, in determination of Mode I stress intensity factors in surface-flawed plates, 173
Shell caps, spherical, vibration tests on, 27
Shells:
  clamped, 51
  cylindrical, 37
  simply supported, 59
Shot peening, analysis of, 95

SOME BOUNDARY INTEGRAL EQUATION SOLUTIONS FOR THREE-DIMENSIONAL STRESS CONCENTRATION PROBLEMS, *Paper*, 207
SOME USEFUL RESULTS IN THE CLASSICAL HERTZ CONTACT PROBLEM, *Paper*, 101
SOME USEFUL RESULTS IN THE TANGENTIALLY LOADED HERTZIAN CONTACT PROBLEM, *Paper*, 107
Stable crack growth resistance, of ductile materials, determination of, 151
Stainless steel, AISI 316, 189
Stress concentration, 7, 207, 225
  around a hole in a uniaxially flat plate, reduction of, 135
STRESS CONCENTRATIONS DUE TO AXIAL TENSION AND BENDING OF LOADED AXISYMMETRIC PROJECTIONS, *Paper*, 7
STRESS CONCENTRATION FACTORS FOR CRACKED C-SHAPED AND RING TYPE TEST-PIECES, *Paper*, 225
Stress analysis, 199, 231, 253
STRESSES IN A BOTTOMING STUD ASSEMBLY WITH CHAMFERS AT THE ENDS OF THE THREADS, *Paper*, 15
Stringer stiffened cylinders, elastic buckling of, 41
Surface-flawed plates, Mode I stress intensity factors in, 173

Test-pieces, C-shaped and ring type, 225
THE BOUNDARY INTEGRAL EQUATION (BOUNDARY ELEMENT) METHOD IN ENGINEERING STRESS ANALYSIS, *Paper*, 199
THE DETERMINATION OF THE EQUIVALENT STRAIN IN FINITE, HOMOGENEOUS DEFORMATION PROCESSES, *Paper*, 119
THE UNIAXIAL AND BIAXIAL MONOTONIC AND CYCLIC PLASTICITY BEHAVIOUR OF A LEAD ALLOY MODEL MATERIAL, *Paper*, 125
Thermally loaded cylindrical shells, elastic–plastic analysis of, 37
Thick-walled cylinder, cracked, elastic–plastic analysis of, 253
Thin-walled domes under uniform external pressure, deformation and stability studies of, 167
THREE DIMENSIONAL ELASTIC STRESS DISTRIBUTION IN END-MILLED KEYED CONNECTIONS, *Paper*, 143
Three dimensional stress concentration problems, boundary integral equation solutions for, 207
Tube inversion:
  external, 178
  internal, 183

Uniaxially loaded plate, stress concentration around a hole in, reduction of, 135

VIBRATION TESTS ON SPHERICAL SHELL CAPS, *Paper*, 27
Visco-elastoplastic strip containing a hole, creep stress redistribution in, 1
Viscoplasticity, large strain large deformation problems of, application of boundary element method to, 261

White light speckle method, 23
